

Connecting to SHU WIFI with an Android device

These instructions are to be used as a basis for setting up Android phones. There are many different versions of Android and the screens shown may not look the same as what you see on your own phone. The settings required are always the same.

1. Click the '**Settings**' app

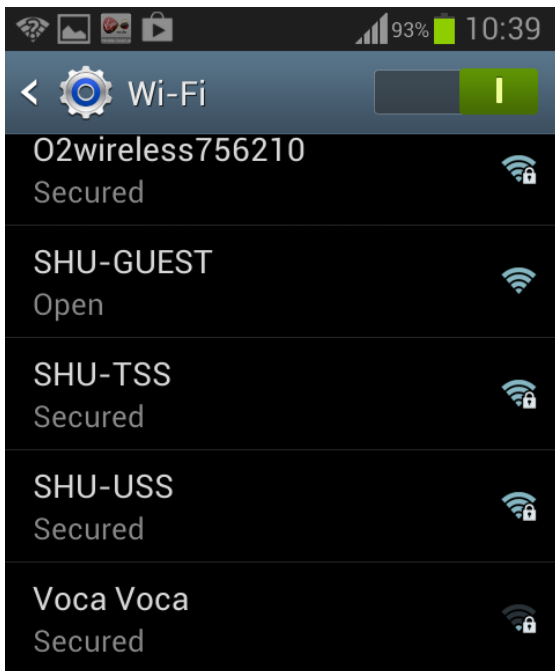

2. Click '**Wi-Fi**'

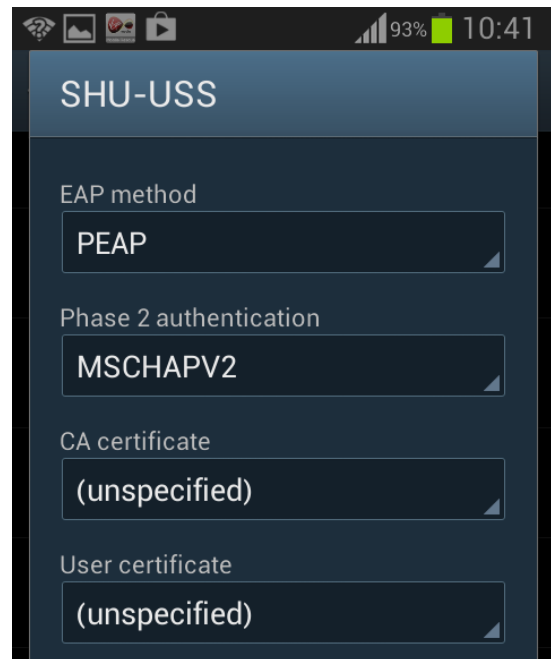

Connecting to SHU WIFI with an Android device

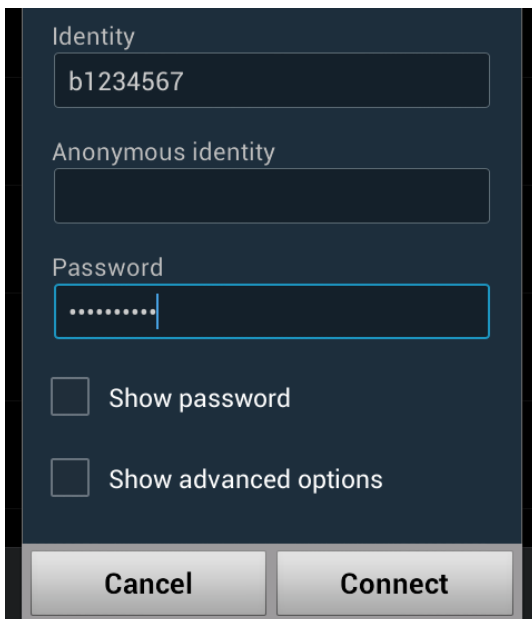

3. Click **SHU-USS**.
scroll

4. Enter the details shown below then
down

5. Enter your SHU username and
the password then press '**connect**'

6. After a short wait you should see
status '**Connected**' under SHU-USS
